

MIB Engineers

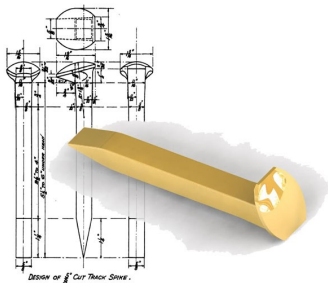

Modeling and 3D Cad solutions

MIB Engineers offers cutting edge 3D solid modeling and conversion.

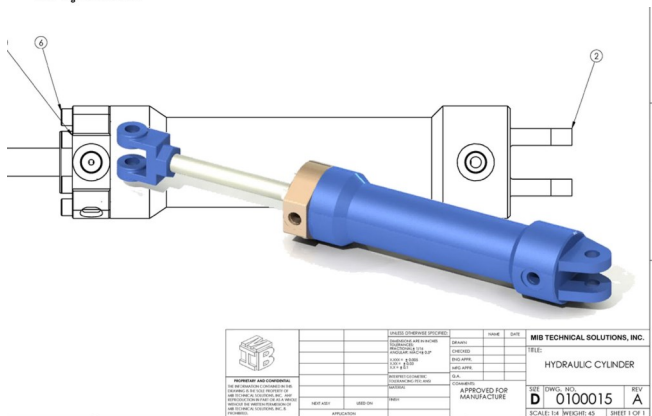

- Convert your existing Drawings to 3D models or images.
- Produce models from PDF, AutoCad or even paper prints.
- Files can be in any common format.
- Electronic Drawings produced on your existing drawing template.

A Photorealistic model can be made from any line drawing. The model can be placed in any virtual environment that is provided to us by the customer and shown under any desired lighting conditions.

A model can be produced from any sufficiently detailed drawing and rendered in any color and finish. For example this rail spike produced from a 1921 drawing and shown in polished gold.

Models can be made from drawings OR drawings made from models, whatever the customer requires. Assembly bills can be on the same sheet on separate sheets or in Excel
