

# MIB Engineers

## Survey and Inspection Services

**MIB Engineers** conduct Professional Machine Surveys for equipment users and installers. Our engineering survey services include the following:

- Machine failure analysis
- Machine leveling and foundation analysis
- Machine condition analysis
- Procurement and market studies
- Pump and valve upgrades
- Seal leakage resolution
- Hydraulic machines and Power Unit expertise
- Reverse engineering and 3D Modeling
- Corrosion and wear analysis
- Machine maintenance planning
- Testing and commissioning

For problem investigation and machine upgrade projects, MIB Engineers has the expertise to help you improve your machinery lifetime and efficiency. MIB Engineers will help you prevent breakdowns or production stoppages.

Call MIB Engineers for all your machine survey and engineering consulting needs
